**Testis****CS Tumor Size****SEE STANDARD TABLE****Testis****CS Extension (Revised: 07/26/2007)**

**Note:** According to AJCC, "Except for pTis and pT4, extent of primary tumor for TNM is classified by radical orchiectomy. TX is used for other categories in the absence of radical orchiectomy." For Collaborative Staging, this means that the categories of T1, T2, and T3 are derived only when Site Specific Factor 4 indicates that a radical orchiectomy was performed. See the Extension Orchiectomy table for details.
